

Notice to Parents

As part of our commitment to provide your child with a safe, pest-free learning environment, The Lindale School District may periodically apply pesticides to help manage insects, weeds or pathogens. Pesticide applications are part of our integrated pest management (IPM) program, which relies largely on non-chemical forms of pest control. Pesticide applications on Lindale School District property are made only by trained and licensed technicians. Should you have questions about this district's pest management program or wish to be notified in advance of pesticide applications, you may contact our IPM coordinator: Ed Rienhardt (903)-881-4100 or email: edr@lisdeagles.net

ASBESTOS

Lindale ISD maintains a complete Asbestos Management Plan for each campus. The Management Plans have been developed and are maintained in accordance with the EPA Asbestos Hazard Emergency Response Act, (AHERA). In accordance with the AHERA standards periodic surveillance is conducted every 6 months. Every 3 years a reinspection of our facilities is performed by an EPA Accredited Asbestos Inspector. In addition to this reinspection, a review of our Management Plan is performed by an EPA Management Planner. Copies of the reinspection report and management plan update are available for inspection at the superintendent's office during business hours.
